

Digital Teaching and Learning 4.0

Sample Course: Digital Media Tools and Applications for TVET

During and after the COVID-19 crisis modern digital cooperation and production suites like MS Teams, Zoom / Google Suite as well as Social media became very popular for e-learning by educational institutions all over the world. It is expected that these and similar applications will permanently change the way of teaching and learning. The course gives an introduction on how to use these tools and applications for teaching, learning and collaboration in TVET.

- **Content, elements, format and duration can be customised to the respective needs**

Learning outcomes

On completion of the training, participants

- apply relevant pedagogical and technical principles for digital teaching and learning with digital media tools and applications
- develop and design courses with digital media tools and applications
- conduct and evaluate courses in digital media tools and applications
- integrate different digital media tools and applications into conventional teaching and learning
